

COPY / OF 2

6 September 1956

Dear George:

Reference is made to our conversation on 30 August 1956 regarding the quantity and types of antennas for System I.

You are advised that our requirements have been established for twenty (20) sets each of "X" and "S". Further, no spare antennas will be required either for support or with the spare System I sets. Request you take action as necessary to procure the required antennas.
